INFORMATION DISCLOSURE SHEET

1) Applicant discloses U.S. Patent No. 6,199,213 ('213) "A Free-Size Fitted Item For The Head" as "A modified cap construction utilizes natural stretch fabrics to acquire a multi-axial flexibility capable of comfortably fitting wearers having a range of head sizes. The same theory may be applied to any article of manufacture that is designed to be worn on or around the head. The unique headband portion is fashioned with a soft, absorbent and non-oppressive multi-axially

stretchable fabric that is attached along its lower edge to the interior surface of the material of the hat. The structure and multiple size capability of the free size fitted cap offers the aesthetic appeal of the fixed size style cap together with the feel of its custom fit and the lasting shape of its fabric.” While the ‘213 patent has a multi-axial flexible headband, it does not claim to be fabricated from two or more segments of possibly the same or different materials like the applicant claimed in his application. The applicant has claimed that in the two or more segment headband, each segment can have a different color or the same color. Unlike the ‘213 patent, the applicant has claimed a foam inner layer for better fit and sweat absorption.

Date: 09/04/01

Respectfully submitted,

Brett Halperin
